**Electronic monitoring of your  
farrowing pen**

# Pig-SIGNAL Management

**Best Farm A/S electronic round-the-clock monitoring of the farrowing pen. Pig-SIGNAL Management is information directly to your phone or tablet.**

With Pig-SIGNAL Management you can easily monitor your sows in the farrowing pen both before, during farrowing and in the following days. Pig-SIGNAL Management allows you to:

- Follow the farrowing with a thermographic camera
- Monitor around-the-clock when your sows are up
- Measure how much your sows drink within a certain time interval
- Monitor the temperature in the piglet nest

Pig-SIGNAL Management provides 2 types of information – ACTION that warns of visits or activity at the sow – and INFO that provides other relevant information about the sow.

Photo 1: The home screen on the app on your selected device

Photo 2: The overview – this provides an overview of all current ACTION's and INFO's

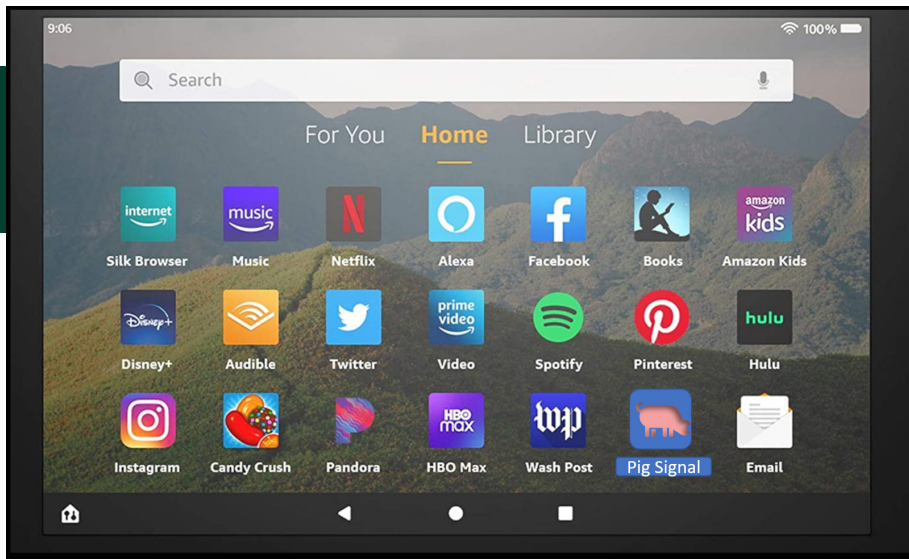

Photo 3: Overview of the barn section showing instantly which sows ACTION and INFO are referring to

Photo 4: A control panel found under each individual sow (in this case sow No. 108). When the task has been corrected, this can be marked and the sow's number will turn green again

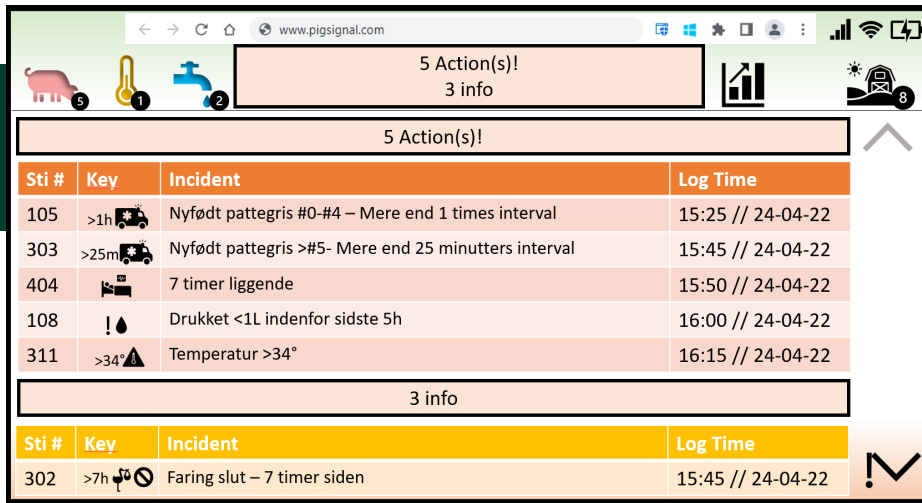

Pig-SIGNAL Management provides you ACTION and INFO around-the-clock – a sublime support system during the working day whether it is night or day. Pig-SIGNAL Management provides an overview, helps with prioritization and eases the workload.

Pig-SIGNAL Management is adapted to each individual farm – Best Farm A/S offers service backup within 24 hours.
