

Precision Feeding Systems

A Step Forward to Increase Performance

LACTATION FEED SYSTEMS 100% STANDALONE

Each system works with a trigger and is compatible with the mobile app

Increases feed intake.

The trigger allows on-demand feeding.

Easy to install and to use.

Optional water management.

Working hours better invested.

Wireless connexion.

Generates reports to locate low-consumption and wasteful sows.

Feeding schedules and curves easily manageable by the producer.

Daily reports to follow individual sow feed intake.

Management of the litter comfort zone.
No need to add additional electric outlets – The Gestal Quattro shares the same outlet as the heat lamp/mat.

Feed blending available.

Electricity management.

Each feeder has a screen to quickly detect which sows need attention.

Basic sow information visible at all time on each feeder.

No major electric installation needed.

Reliable and heavy duty entry level model.

Manage sows individually using feeder keypad or via tablet application.

OPTI

OPTimize your GESTAL QUATTRO
with Feed Blending.

The Opti is designed for use in commercial and research applications alike. Each standalone unit enables precision feed delivery/blending and prevents residual diet contamination while allowing diet changes from remote access locations.

Ability to decrease feeding costs.

Mounts on up to 4 feed lines.

Ability to automatically adjust feed curves daily, eliminating the need for strict feeding phases.

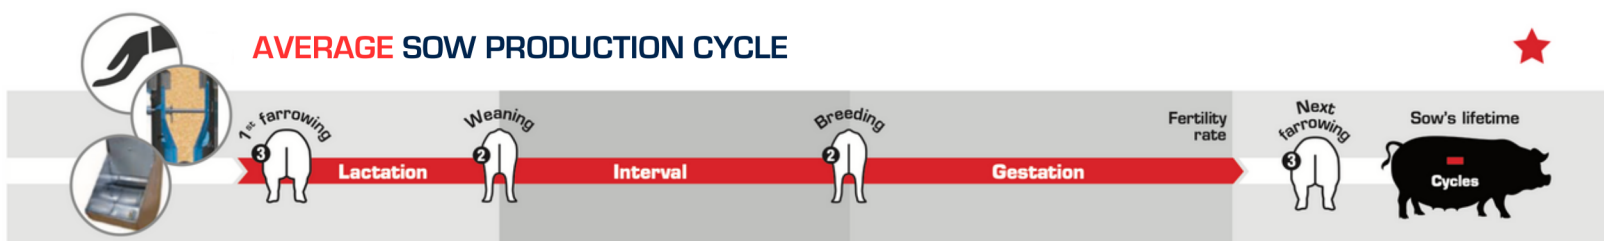

Simplifies feed ordering and bin management.

Allows the producer to feed to each sow's needs, considering her parity, day of lactation, and piglets nursed.

- ⊕ Labour Saving
- ⊕ Electricity Saving

CUMULATIVE EFFECTS OF GESTAL LEAD TO A RETURN
ON INVESTMENT IN LESS THAN TWO YEARS,
ACCORDING TO CUSTOMERS' TESTIMONIALS.

HIGH PERFORMANCE MADE EASY
